Enhanced HD Video and Voice for Exceptionally Clear Communication

· T5S Smart Media Phones deliver crystal-clear immersive conversations thanks to Optima HD voice and Yealink Noise Proof technology that effectively eliminate non-human background noise.

· The T58V and the T58A support HD video communication with Yealink's CAM50 (optional on the T58A). In addition to an adjustable seven-inch touchscreen interface, the phones enable users to access lifelike video calls easily and to adjust the viewing angle flexibly. Increase communication productivity by making every conversation clear, comfortable and focused.

One-touch Operation and Control

· Yealink Smart Media Phones feature a seven-inch capacitive touch-screen for smooth and delightful operation and control. The intuitive touchscreen enables users to access to and manage the telephony features with a simple touch of the screen.

· The phones offer multiple adjustable elements, including an adjustable screen and camera on T58V(A), and a two-angle stand on T56A. This flexbility accomodates a user's preferred viewing angle and base height, and integrates into variety of usage scenarios.

Deliver Versatility with Deep IP Intercom Integration

Customers can enjoy a high ROI by making the phone a two-in-one tool for both business collaboration and for door monitoring and unlocking. Versatile and smart, the T58V and T58A integrate with IP video intercom systems from major vendors in the market, including 2N, Baudisch and CyberData. Deliver true ROI and cost-efficiency to customers.

Advanced features include:

· Visitor preview before picking up the phone;
· One-touch door open (with or without answering the phone);

· Easy monitoring by connecting via the video intercom or video surveillance, a setup that is ideal for warehouses and logistics.

Effortless Business Customization

· Based on the Android OS, the phones feature great capabilities that integrate seamlessly with third-party applications. Officially supported apps include BroadSoft Communicator, Skype, Skype for Business and Zoom Meeting.
· Support for Yealink's SDK (Software Development Kit) allows service providers and Yealink to work together to strengthen and deepen integration and to jointly develop app features on the phone. Help improve communication efficiency by lowering the learning curve, providing more features and unifying user experiences.
