OUR COMPANY

The company was founded in 2018

We are distributing leading lubricants for any kind of vehicle

The main mission of our company is to increase productivity, viability and endurance of you vehicle

Our mission is to become international trading-service company with well-developed network of regional branches

A WIDE RANGE OF PRODUCTS

We are exclusive distributor of European oil ONZOIL and Petrovöll as well as American oil Philips 66

ONZ OIL

Petrovöll

BEST VALUE FOR ITS MONEY

It is a wide range of transmission oil and lubricants of the Republic of Belarus

Specifically intended for cars with mileage

Improves engine operation and increase useful life of mechanisms

ONZOIL lubricants possess technical characteristics that best meets the requirements of cars with mileage

#1 motor oil at the conclusion of the competition "Product of the year" in 2016 and 2017 in Belarus

PREMIUM MOTOR OIL

A leading producer and supplier of all kind of lubricants: motor oil, diesel oil, transmission lubricants and ATF

Products are intended for automotive, manufacturing and maritime industries

Products have been produced in Germany with additional equipment for mixing in UAE

Products manufactured by European standards

Certification provided: API, SAE, ISO

Maden
DISTRIBUTION

BY KEEPING GENTLE ROTATION ALL OVER THE WORLD

Phillips 66 comprises 110 years of experience in the production of the best in the vehicle oil and lubricants industry

Using the Phillips 66 products – using the best!

Starting at the line of oil for the passenger vehicles and ending with lubricants for heavy machinery. Every product intended to lifetime extension of engines and parts

3 main functions of oil

Minimizing friction

Basic function of lubricants. Because details are very close to one another and moving at a high speed, therefore needed proper lubrication that calms tensions

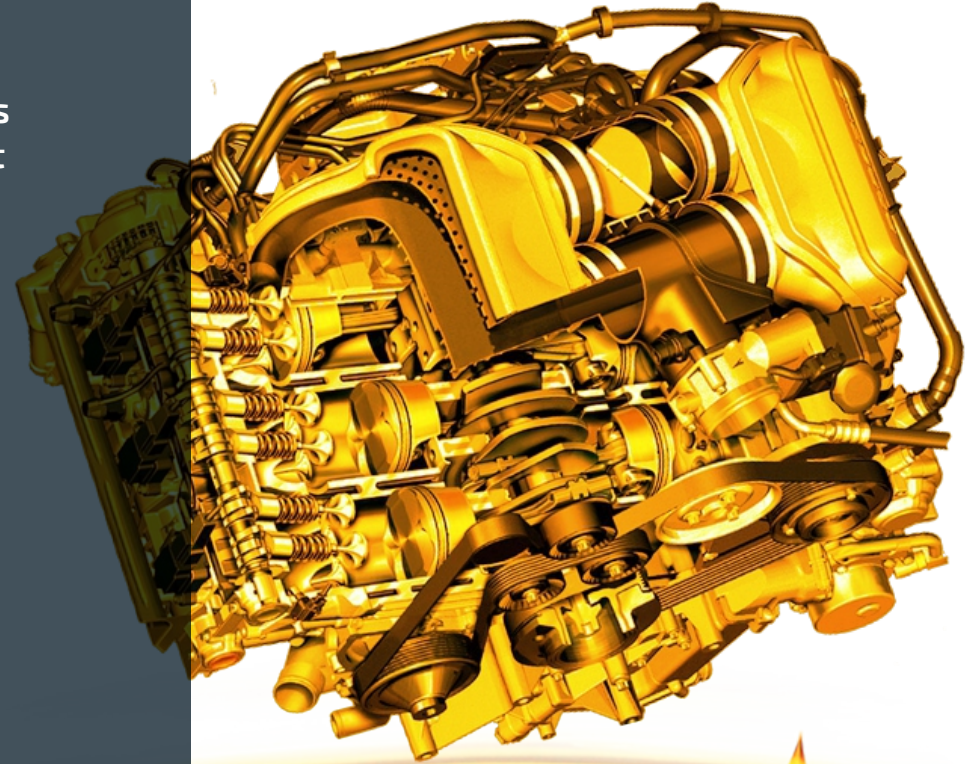

Cooling

One of the main functions , internal combustion engine heats up to high enough temperature

Cleaning

Removing backlog engine deposits. During combustion soot and other substances is formed. These substances accumulate in oil passages and it makes difficult to oil move, which not allow for reduction of solvent friction and motor cooling

Maden
DISTRIBUTION

Oil formulation

Motor oil consists of two elements: base oil and additives. Base oil amounts from 70 to 95% overall level of oil and considered to be a fundamental component

The remaining 5-30% of finished product is a various kinds of additives

All consistent in size and molecules' shape of basic synthetic oil as well as cohesive force is minimizing friction between metal surfaces and contributes to improving the operating characteristics:

Reduces fuel consumption and increase output power. Increasing resilience to temperature changes and oxidation processes
This allows for clean parts of engines. This tends to prolong the interval between replacement finished lubricating material

Maden
DISTRIBUTION

GUARANTEE OF QUALITY

We guarantee reliable safety for your engines
through high-quality raw materials
(Certified products ISO 9001: 2008)

TOLERANCE FROM THE MANUFACTURER :

We offer products which is approved by European car manufacturers association ACEA – DAF, Volvo, MB, Scania, VW, BMW, GMC as well as American Petroleum Institute API

SCANIA

Volkswagen

DAF

Mercedes-Benz

GMC

PRIVATE MODERN WAREHOUSE:

We will provide you with all the necessary
stock in the short term

A COMPETITIVE PRICE:

We are the supplier a product directly from
producing factories, without intermediaries

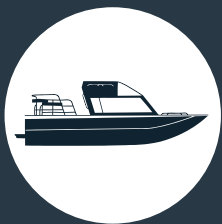

OUR CAPACITY:

Oil for passenger
vehicles

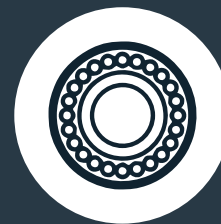

Oil for
motorcycles

Boating
engine oil

Cooling
liquids

Lubricant

Oil for commercial
vehicles

Oil for agricultural
equipment

Industrial liquids

Transmission fluid
