## Spheres of use

### Industry

Mining, oil and gas, beverage and food, power industry, pulp and paper

### Municipal

Waste water, desalination, high-rise buildings

### Agriculture

Green house, irrigation

### Household

Water Conditioning, Softening and Drinking Water  
Solutions for apartments, cottages, town houses.

## Water filtration solutions

Access to clean water is one of the world's greatest challenges - for drinking, for industry, and for irrigation. For more than 40 years, Amiad has helped meet this vital need by providing outstanding filtration technology to industrial, municipal and irrigation users around the world.

With a full line of filtration solutions - plastic, steel, disk or thread; manual to fully automatic; filtration levels from 3500 microns to 2 microns - Amiad offers filtration systems to meet nearly any need.

Amiad filters are in use in 70 countries around the world, in applications that include: Agricultural and landscape irrigation; Aquaculture; Industrial water processing; Industrial wastewater treatment;

Municipal water treatment (drinking and waste treatment); Prefiltration to protect costly media and reverse-osmosis systems

Every Amiad filtration system is built for efficiency, effectiveness and reliability. And every Amiad filtration system is backed by our commitment to customer service.

# HUBER

## TECHNOLOGY

**WASTE WATER** Solutions

## Waste water treatment

HUBER SE, headquartered in Berching, Germany, is a worldwide active company in the field of water, wastewater and sludge treatment.

More than 600 employees develop and manufacture products, manage projects and develop system solutions for municipalities and industries. With more than 31,000 installations worldwide HUBER is one of the internationally leading companies in this field. HUBER's adapted treatment processes contribute to the solution of the global water problems.

HUBER supports its customers in about 60 countries around the world through subsidiaries, offices or representatives by providing know-how and innovative products for water, wastewater and sludge treatment.

**Innovative machines, plants and stainless steel equipment for municipal and industrial water, wastewater and sludge treatment**  
**Competent in stainless steel - Leading in wastewater technology**

## Spheres of use

- Heavy and light industry;
- Wastewater reuse and recovery ;
- Rainwater disposal.

**Waste water treatment plant , Kotelnikovo, Volgograd region,  
10000 m<sup>3</sup>/day**

## Comparative analysis of conventional and modern techniques of water treatment

### Conventional scheme of waste water treatment

### Modern scheme of waste water treatment (based on Huber equipment (Germany))

### Advantages of modern scheme against conventional:

- Space saving Huber equipment conserve installation spaces;
- Computerization of equipment reduce needs in maintenance;
- Due to a top quality equipment the outlet water can be reused.

## UV water treatment systems

**TrojanUV** specializes in the design, manufacture and sale of pressurized and open-channel ultraviolet (UV) disinfection systems for municipal wastewater, municipal drinking water and environmental contaminant treatment applications. Today, **TrojanUV** has the largest installed base of UV systems in operation on the planet.

Many of **Trojan UV** innovations define the industry standards for safeguarding our water from the damaging effects of microbial and chemical contamination.

---

### Spheres of use

- Secondary and tertiary disinfection;
- Chlorine conversion;
- Water reuse;
- Contaminant treatment.

Atlantium Technologies Ltd. was established in 2003 to provide the world with safe and sustainable water treatment solutions.

The company's team of scientists and engineers designed an innovative solution based on UV (ultra violet) disinfection, fiber-optics and hydraulics. It takes water safety to levels never before achieved with other UV systems or without chemicals, and provides industry and municipalities with a sustainable, measurable option.

Today Atlantium is a fast-growing private company whose UV systems are field-proven globally with Fortune-500 companies among its loyal customers. Customer service centers are strategically placed to provide immediate, on-going support.

The company's solutions are third party validated to strict US FDA and EPA (Environmental Protection Agency) regulations.

## **Spheres of use**

- Water treatment systems for municipal needs
- Use in food and beverage industry;
- Pharmaceutical needs

# Pentair Water

Water covers over 70 percent of the earth's surface. Pentair has the innovative solutions to do something with it.

Pentair is a leading provider of water solutions addressing the world's water scarcity issues and delivering quality drinking water to homes, businesses and communities. With the broadest offering of water pumps, filters, systems and solutions, Pentair helps each step of the water process. Whether it is water from the ground, ocean, lake or rainwater collection, Pentair has products and systems to ensure that water is moved and treated to where we need it most.

## Fairbanks Morse

INDUSTRIAL PRODUCTS

For over a century, **Fairbanks Morse** has been manufacturing a wide range of pumps for applications in municipal and industrial installations. These include dry pit and submersible solids-handling, dry pit and submersible recessed impeller, vertical line shaft and submersible turbine, mixed-flow and axial-flow propeller pumps, horizontal and vertical split case, a complete line of UL Listed and FM-Approved fire pumps (both electric motor and diesel engine driven), domestic jet and submersible well pumps.

## HYDROMATIC®

Pentair Water

**Hydromatic** has been a national leader in the wastewater pump industry since 1959. Today, Hydromatic continues to design and manufacture one of the most extensive and diversified lines of submersible wastewater sump, sewage, effluent, grinder and large solids handling pumps for the municipal, commercial and residential wholesaler market sectors. Comprehensive engineering, testing and production processes ensure that **Hydromatic** pumps will continue to be the most reliable and efficient in the wastewater industry.

**Pentair  
Water**

## Central Water Purifier

The **LineGuard** filters water at the point where it enters a facility or home to guarantee high quality, safe water for those circumstances in which the water quality is not secured or additional treatment is required (e.g. hospitals). It removes viruses for >99.99% (log 4) and bacteria for >99.99999% (log 7). The capacity of one LineGuard system is 60 l/min at 2 bar, depending on the feed water quality. The long service life provides up to 5,000 m<sup>3</sup> per system. It works on waterline pressure and has a built-in controller for automatic backwash and forward flush cleaning cycles.

---

### Spheres of use

- Cottages, apartments;
- Drinking, product and process water;
- Hotels and restaurants, to guarantee safe and high-quality water for drinking, food preparation, showers and laundry

## Membrane elements for water treatment

Since its founding in 1975, Hydranautics has been committed to the highest standards of technology research, product excellence and customer satisfaction. Hydranautics entered the reverse osmosis (RO) water treatment field in 1970, and is now one of the most respected and experienced firms in the membrane separations industry. Hydranautics became part of the [Nitto Denko](#) Corporation when it was acquired in 1987. Hydranautics corporate headquarters is located in the city of Oceanside, California in a 160,000 ft<sup>2</sup> (14,684 m<sup>2</sup>) manufacturing facility residing on 14 acres, all owned by Hydranautics.

Hydranautics' products are currently in use on seven continents throughout the world for such diverse applications as

- potable water,
- boiler feed water,
- Industrial process water,
- wastewater treatment,
- surface water treatment,
- seawater desalination,
- electronic rinse water,
- agricultural irrigation
- pharmaceuticals.

## Water treatment solutions

Odis Filtering LTD has more than 25 years of experience in water treatment solutions. Odis core activity is water treatment. Odis design, manufacture, install and commission water and wastewater treatment plants. Each of Odis solutions is specifically designed for each customer. The "custom made" solution considers the exact needs (both technically and economically) in order to give the customer the most efficient solution. Odis is active and well known in the international market, through its subsidiary companies, distributors and representatives all around the globe. Odis engineering department provide wide variety of solutions and implements the most advance technologies, In order to create the perfect solution for each project. Odis investment in its R&D department yield unique patent protected products and solutions.

Lakes and reservoirs  
Rivers and channels  
Wells

Surface water

### **LitePure® series**

Sea water  
Brackish water  
Salt water  
Wells with salt water

## Purification and bottling water treatment plant

The LitePure B - compact and mobile water supply unit, is designed to supply safe drinking water at any site and adverse condition, and to fill bottles and jerry cans.

The water treatment unit can be assembled in a 20' ISO container for easy and fast transportation via ground, sea or air.

The units can be either self-contained with their own power source or powered by external sources.

The LitePure B - eliminates all solids, impurities, chemicals, bacteria and viruses from raw water by means of fine filtration, reverse osmosis units and activated carbon treatment.

The LitePure B is suitable for all-climates, from tropical climate of 50C up to winter climate of -10 C. The equipment employed in LitePure B unit is designed to withstand these climate conditions.

## Control Valves

Founded in 1946, **Dorot Control valves** is a leading global developer, manufacturer and marketer of wide range of products for the water market. Products include Pressure Reducing Valves (PRV), automatic control valves, air valves, mechanical valves and water meters.

DOROT's experienced Research & Development Department has a long tradition of generating innovative solutions for the application of water control systems. These include: waterworks distribution networks, sewage and effluent disposal, fire protection , mining , and irrigation systems.

## Long life valves

**Hakohav Valves** is a valves manufacturing company, founded in 1963, specialist in high quality products and offers a wide range of solutions to a variety of applications including: Water & sewage supply; Agriculture; Water treatment plants; Desalination plants; Cooling systems; Industry plants (chemical & petrochemical, food & beverages, paper & pulp & other) Fire fighting systems.

## Solutions for chemical process industry

With over 25 years of experience SULPHURNET is at the forefront providing process engineering and separation solutions for the Chemical Process Industry.

SULPHURNET brings together the knowledge of process engineering, filtration technology and outstanding skills in mechanical engineering, offering successful process solutions. Our solutions are designed for application-specific needs, to meet all process performance requirements by our clients.

From the first contact throughout production and delivery to after-sales support, SULPHURNET clients benefit from an unrivalled combination of application knowledge, process expertise and after-sales service.

SULPHURNET is your world-leading developer and supplier of complete solid/liquid separation solutions.

- Sulphur processing

AQUA  
CONSULT

## Fine bubble diffusers

The AQUACONSULT Anlagenbau GmbH was founded in 1986 as a manufacturer of fine bubble aeration systems and is concerned exclusively with the planning, development, and production of fine bubble diffuser since the mid-1990s. Development of a diffuser using an elastic perforated-membrane of 100% polyurethane was a revolution in the industry at that time.

High quality manufacturing is assured through a strong and highly-experienced team, as well as a quality control program unmatched in the industry.

OTT GROUP

## Tube membrane aerators

OTT aeration systems are designed to achieve three key benefits: rapid installation, reliable operation and long service life.

All OTT products are 100% Made In Germany. Products in standard dimensions are available from stock. Custom products can be fabricated in exact accordance with your specifications. OTT design and fabricate stainless steel, PP and PVC piping systems.

# The best solution for your house

- Water treatment system is consist of number of components that depends on raw water analysis as well as technical requirements and customer's wish. Typical water treatment system consist of the following filtration stages: cartridge filter for coarse clean, water softener, carbon filter, fine clean cartrige, UV disinfection system, RO system.

Clean water.  
Green future.™

## Water Conditioning, Softening and Drinking Water Solutions

Since 1925, **EcoWater** Systems has been developing innovative and state-of-the-art technology to take care of your home water needs. As the world's largest manufacturer of residential water treatment systems, **EcoWater** has proven to better the quality of your home's water for nearly 85 years.
