## TECHNOLOGY LEGEND

**Active Noise Canceling (ANC) Technology** that reverses surrounding sound waves to cancel low-frequency noise in order to isolate and minimize ambient noise the user can hear.

**Digital Signal Processing (DSP) Mathematical** manipulation of an information signal to actively reduce background noise for improved sound quality, including equalization, acoustic echo cancellation, noise reduction, and audio leveling.

**Dynamic EQ** Optimizes voice quality on calls and automatically adjusts EQ settings when listening to music or for multimedia playback.

**Hi-Fi Stereo** Full-range, dual-channel audio playback capable of frequencies from 20 to more than 20,000 Hz.

**Immersive Audio** Specially designed ear cushions and headband reduce background noise for increased clarity and comfort.

**SoundGuard Acoustic** limiting for protection against sounds exceeding 118 dBA per Telecom Industry Standards.

**SoundGuard DIGITAL** All the benefits of SoundGuard plus anti-startle protection, which detects and eliminates sudden increases in sound, and time-weighted average (TWA) control, which prevents average daily sound exposure from exceeding 85 dBA.

**USB-C** For connection to devices using the latest USB 3.1 standard with a smaller plug that allows connection in either direction.

**Wideband Frequency** range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
