

Solutions Ready:

# Change from manual to **thermostatic radiator valves** and reach **significant savings** now!

New survey conducted by the European Valve Manufacturers Association and ECOFYS in 11 member states proves a huge savings potential, if manual valves are replaced by thermostatic radiator valves in residential buildings.

## € 9,900,000,000

saved in energy cost  
in the 11 investigated  
member states

### 167 TWh / 14.4 Mtoe

Yearly savings by changing the **500 million manual valves** to thermostatic valves

### Savings potential:

### 31 MtCO<sub>2</sub> SAVED EVERY YEAR

or the equivalent to the emission from **15.3 million cars**

### 15% OF THE EU 2030 CO<sub>2</sub> TARGET

for the entire construction sector could be reached

### 7% OF THE TOTAL EU HEATING CONSUMPTION

can be saved by converting from manual valves to thermostatic valves in all EU member states

Solutions Ready:

# From manual to thermostatic: Little effort - huge effect

## Average installation cost for a single family house in e.g. Germany

8 radiator lockshield valves

€ 90

8 RAW sensors

€ 150

8 RA-N presetting valves

€ 150

Labour cost: 4 hours

€ 250

Better economy, better health,  
**better quality of living**

**Lower**  
heating cost

**Better**  
interior climate

**Reduce risk of**  
mould and fungus

**In full control**  
of the temperature
